Digital Library Week 5

Gantt Chart

We achieved our goal for this week and are still on track with our Gantt chart

This Week

- Started user/account creation process
  - Can add users to database manually
  - Installed node package dependency called bcryptjs
    - Generates random “Salt”
    - Makes hashes computationally expensive to crack
    - Provides built in password verification

```
josh@Joshuas-MacBook-Air-116 backend % node addUser.js testuser test@example.com password123
[dotenv@17.3.1] injecting env (3) from .env -- tip: enable debug logging with { debug: true }
✅ Connected to MongoDB
✅ User created successfully!
Username: testuser
Email: test@example.com
User ID: new ObjectId('699dc551e5fd749e8d538a6c')
josh@Joshuas-MacBook-Air-116 backend %
```

Challenges

- Implementing hashing method
  - Most time was spent researching hashing methods
