Digital Library Week 7

Gantt Chart

We made good progress this week and are still on track with our Gantt chart

This Week

- We have successfully integrated the account creation process with the UI

Challenges

- Although the UI login is implemented there are still several issues/bugs that need to be ironed out:
  - Logging in bugs out the library page
  - Email verification/password reset
  - Needs light/dark mode flexibility

What’s Next

- As we enter Spring Break, we intend to work over the break.
  - Ironing out the issues listed previously will allow us to implement our chosen storage method for Book objects, completing the personalized library aspect of our application
